

Geography- Year 4

Autumn 1

Around the World in half a term

Name and locate Coasts and Rivers in UK

- Rivers are split into 3 sections: the upper, middle and lower course.
- The source is where a river begins, usually on higher ground.
- The mouth of the river is the point where the river joins the sea.
- The largest river in the UK is the River Severn which is located in parts of Wales and England.
- A coast is where the land and sea meet.
- A beach is a narrow strip of land by the sea or ocean.
- A cliff is a tall, steep rock that has been eroded.

Spring 1

It's a small world...or is it?

Name and locate countries

- Locate The UK, France, Spain, Germany, Italy Greece, Russia, Poland, Romania, Hungary.
- There are 23 countries in North America.
- The largest country in North America is Canada.

- There are 12 countries in South America.
- The largest country is Brazil.

Summer 1

This is Our Earth

The Water Cycle

- The journey water takes as it moves from the land to the sky and back again is called The Water Cycle.
- Evaporation is when water changes from liquid to gas due to heat.
- Condensation is when water vapour cools and turns into clouds.
- Precipitation is rain, hail, sleet and snow that fall from the clouds.
- Collection occurs when water that falls from the clouds, collects in oceans, rivers, lakes and streams. Most will infiltrate (soak) into the ground and will collect as underground water.
- The draining away of water from the surface of the land back into a river / lake / ocean is called run-off.
